High brightness LED beads LifePO4 Battery Anti UV

MUSE | Solar Bollard Light

MUSE solar bollard light offers a futuristic design with a five-year warranty for public space outdoor lighting applications where the benefits of IK10 vandal resistance are required. LifePO4 battery combined with an intelligent lighting program provides 100% power up to 280 lm for 4 hours before changing to 30% power of full production to 100% when the PIR sensor is triggered. It ensures up to four nights of lighting on a single full charge of the battery. The mission of MUSE is to comply with the requirement of the Dark Sky Association by limiting the upward light waste ratio (UWLR) to <1%. Limiting upward light reduces environmental light pollution and protects the view of our night sky for all.

We also offer the MUSE Solar bollard light in a wildlife-friendly version retaining all the features of the original product. Wildlife-Friendly lighting is specifically designed to minimize the ecological impact on animals and insects.

Battery

LiFePO4

AI-GL275R/W Solar Wall Light

Working Mode

AI-GL275R Solar Bollard Light

36 hours backup with fullly charged battery

LiFePO4 battery inside more than 10 years lifetime

LED power is automatically adjusted to save energy.

Equipped PIR motion sensor to save energy

Dusk to Dawn automatically ON/OFF

High luminous flux output up to 280lm perforance

Model	AI-GL275R	AI-GL275R/W
Lighting performance	1.5W >280lm	1.5W >280lm
Solar panel	5V 6.2W	5V 6.2W
Product size	Φ 275*900mm	323*275*195mm
ССТ	2200K~6000K	2200K~6000K
LiFePO4 battery	38.4WH 3.2V	38.4WH 3.2V
Charge & discharge time	5 & >24 hours	5 & >24 hours
Sensor type	PIR motion sensor	PIR motion sensor
Fixture color	Black /Grey	Black /Grey
Certificates	CE IP65 IK10	CE IP65 IK10
Waranty	3 years	3 years
